

Adriana served as the 2021-2022 UTMB Health System Administrative Fellow. During her fellowship, Adriana facilitated numerous process improvement initiatives across the organization, participated in UTMB Health's first system-wide Joint Commission survey, implemented an Administrative Internship program, and gained experience in program and service line development. After completion of her fellowship, Adriana transitioned into her current role as Service Line Operations Manager working under the Vice President of Health System Strategy. In this role, Adriana collaborates across the enterprise to coordinate the development and operations of various Service Lines to achieve key strategic objectives in a patient-focused manner.

Prior to joining UTMB Health, Adriana worked in an outpatient surgery clinic in the Texas Medical Center where she gained experience in clinical operations, data analytics, and developed a thorough understanding of revenue cycle operations.

Adriana earned a Bachelor of Science in Chemistry from Texas Christian University in Fort Worth, then graduated with a Master of Healthcare Administration and Master of Business Administration in May 2021 from Texas Woman's University in Houston.
