

Anita Ying, M.D., M.B.A. is a Professor in Endocrinology and Pediatric Endocrinology at UT MD Anderson Cancer Center. She received her B.A. in Sociology from Rice University and her M.D. from Duke University. She completed a residency in Internal Medicine/Pediatrics at Duke and a fellowship in Adult and Pediatric Endocrinology at Baylor College of Medicine and MD Anderson Cancer Center. She joined MD Anderson as faculty in 2008. She completed her Executive MBA with Healthcare specialization at Rice University in May 2013, and received the Jones Scholar Award.

Dr. Ying provides clinical care as the primary oncologic endocrinologist for children and adults with endocrine tumors, such as thyroid cancer, pituitary tumors, and genetic endocrine tumor syndromes. She also sees MD Anderson cancer patients who develop endocrine complications from their cancer treatment. Dr. Ying believes in the importance of patients and their families participating in treatment decisions as a partnership with their provider teams.

As Vice President, Ambulatory Medical Operations, she oversees with her administrative partner the clinical operations of the outpatient enterprise on the Texas Medical Center campus and the Houston Area Locations. Dr. Ying strives to create a safe, high-quality, and streamlined experience for patients, staff, and providers.

Dr. Ying serves on the board for the San Jose Clinic, a safety net clinic that provides medical, dental, and pharmacy care for the uninsured. Dr. Ying is also a faculty advisor for MD Anderson's Institute for Cancer Care Innovation (ICCI), building on the work of Michael Porter's principles of value-based health care delivery, focusing on defining the outcomes for cancer patients and costs of care. She has written numerous book chapters, articles, and clinical reviews on the care for adults and children with inherited endocrine tumor syndromes and thyroid cancer.
